NOTICE TO RESIDENTS ON STREETS TO BE REPAIRED AS PART OF THE GREEN TOWNSHIP STREET REHABILITATION PROGRAM

Your street is *one of eight* scheduled to be repaired as part of the 2013 Green Township Street Rehabilitation Program. This program takes place in several phases that will begin on or around June 17th and should be completed some time in October, weather permitting. *Work will begin on your street in the next week or so.*

As is to be expected with any major construction project, inconveniences will surely have to be dealt with. Green Township and its contractors will work to ensure that these are kept to a minimum. *Cooperation between residents, their neighbors, and our contractors will help in minimizing inconveniences and expediting the construction process.*

CONSTRUCTION SCHEDULE: There can be as many as eight phases to the construction process depending on whether your street has curb on it or not, or if your street is constructed of asphalt or concrete.

- Phase 1- Repair of concrete curb (if applicable)
- Phase 2- Removal of existing asphalt pavement surface (if applicable)
- Phase 3- Pavement repairs, including full depth base repairs and crack and seating of concrete pavements
- Phase 4- Installation of leveling course of asphalt
- Phase 5- Utility adjustments such as the raising of manholes
- Phase 6- Installation of surface (final) course of asphalt
- Phase 7- Sealing of asphalt edges along curb & gutter
- Phase 8- Completion of all items on project punch list

The time between the completion of any one phase and the start up of another can vary from *three to five weeks*. This is due to the fact that the contractor is working on *eight other streets in addition to yours*.

RIGHT-OF-WAY: Green Township and its contractors and/or sub-contractors are not responsible for items damaged during the course of construction that are located within the public right-of-way such as invisible dog fences, lawn sprinklers, trees and other plantings. The public right-of-way generally extends 12' from the back of curb or edge of road. This area includes the grass strip between the street and sidewalk and the sidewalk itself.

TRAFFIC: One lane of traffic will be maintained throughout construction. While construction operations are in progress traffic *may be limited to one-way* to ensure the safety of motorists and work crews. Please observe any detours posted and plan

your trips accordingly. There may be instances throughout the day where the need arises to block the street for short periods of time. These instances will be limited and kept to a maximum of ten minutes.

PARKING: On street parking will be severely limited during those times when crews are actively working on a street. Please comply with no parking signs as they are posted. Those who can park in driveways are asked to do so as to keep on-street parking spaces open for those who lose access to their driveways during curb repair work and construction crews and equipment.

CONSTRUCTION HOURS: Construction activity can generally be expected to take place between 7:00 a.m. and 5:00 p.m. weekdays. When paving is taking place crews may work until dark. Weather could dictate that work takes place on Saturdays, but we generally refrain from scheduling weekend work crews.

In closing, I wish to reiterate the point that Green Township and its contractors will make every effort to keep inconveniences to a minimum. If you should have any questions please contact the Department of Public Services at 574-8832, weekdays between the hours of 7:00 a.m. and 3:30 p.m.

Sincerely,

A handwritten signature in blue ink that reads "Butch Nanney". The signature is written in a cursive style with a long, sweeping underline.

Butch Nanney
